NZ Open Work Visa — valid to Feb 2029

PROFESSIONAL SUMMARY

Business Analytics graduate with hands-on experience in SQL, Power BI, Python, Snowflake, and cloud data platforms. Designs and delivers data pipelines, AI agents, and business dashboards that translate raw data into clear decisions.

SKILLS

AI & Data Platforms: Claude API, AI Agents, Snowflake, Data Lakes, AI-Ready Datasets, GitHub, Railway, Vercel

Data Engineering & Analytics: SQL, ETL/ELT, Power BI, Power Query, DAX, Python, Data Modelling, Data Cleaning, Pipeline Development

Delivery & Stakeholder Management: Agile Environments, Client Engagement, Requirements Gathering, Dashboarding, Process Improvement

Ways of Working: Cross-Functional Collaboration, Independent End-to-End Delivery, Continuous Learning

SELECTED PROJECTS

Kiwi Budget Tours — Founder & Insights Lead

<https://kiwibudgettours.com>

- NZ tourism booking was fragmented across many sites, making it hard for budget travellers to plan a complete itinerary.
- Built a booking platform with a WhatsApp-connected AI planner linked to structured NZ tourism datasets.
- Simplified itinerary creation and improved booking flow through automated conversational queries.

AI CV Assistant — Founder & Developer

<https://prateek02061997.github.io/portfolio2/projects/ai-cv-assistant/index.html>

- Job seekers with inconsistent work histories struggled to produce clean, ATS-ready documents.
- Built an AI agent using Claude API, Railway, and Vercel that parses raw career history into structured, formatted CV data.
- Produces ATS-ready output from unstructured input in seconds — no manual reformatting required.

AI Business Intelligence Copilot — Developer

<https://prateek02061997.github.io/portfolio2/projects/ai-bi-copilot/index.html>

- Analysts spent hours each week manually building dashboards and compiling recurring reports.
- Built a Python- and LLM-powered BI assistant that queries cloud data lakes using SQL and Power BI to answer business questions in natural language.
- Automated routine trend and anomaly detection, reducing time spent on manual dashboard preparation.

Generative AI Business Process Automation — AI Automation Analyst

<https://prateek02061997.github.io/portfolio2/projects/interactive-dashboard/index.html>

- Repetitive data compilation and report drafting were consuming significant team time with no automation in place.
- Designed multi-step Claude and OpenAI API workflows to handle recurring drafting, data compilation, and summary tasks.
- Reduced manual reporting time by 70 percent while keeping human review at each output checkpoint.

Gilmours Distribution Workflow Analysis — Operational Analyst

<https://prateek02061997.github.io/Prateek-Portfolio>

- Dispatch scheduling gaps were causing recurring delivery delays across distribution operations.
- Interviewed warehouse staff, dispatchers, and drivers to map the full delivery process and measure each bottleneck.
- Produced a data-backed redesign recommendation projecting a 20 percent reduction in delays.

Fuel Prices & EV Demand in NZ — Masters Thesis Analyst

<https://prateek02061997.github.io/portfolio2/projects/ev-fuel-price-thesis/index.html>

- Decision-makers lacked empirical evidence linking fuel price movements to EV adoption rates.
- Analysed 15 years of panel data from 4 countries alongside a 103-respondent survey, using Granger causality and ARIMA models.
- Found that policy instability suppresses EV uptake even when fuel prices remain high.

PROFESSIONAL EXPERIENCE

Data Logician & Field Services Specialist — AA New Zealand

Apr 2026 – Present

- Query operational and roadside telemetry data across enterprise data lakes using SQL and ETL tools to find root causes behind service issues.
- Maintain automated pipelines, incident logs, and KPI reporting standards to keep data accurate and consistent across all service metrics.
- Present performance findings directly to customers and internal teams, supporting operational reviews and improvement cycles.

Customer Insights Specialist (Uber Eats) — Teleperformance

Jul 2022 – Dec 2023

- Analysed customer experience data to identify complaint patterns and root causes, producing weekly insight reports for leadership.
- Built ETL workflows that converted complex data streams into structured summaries of key drivers and operational priorities.
- Maintained knowledge base systems and automated data processes that cut manual reporting effort across the team.

Customer Experience & Operations Specialist — Upstox

Apr 2021 – Apr 2022

- Analysed customer onboarding metrics and commercial performance data to map acquisition trends and identify operational bottlenecks.
- Converted fragmented customer feedback into structured insights that helped product and operations teams improve conversion outcomes.
- Managed stakeholder communication to align teams and track initiative results.

Data Associate — Wipro Limited

Oct 2019 – Mar 2021

- Validated healthcare data using SQL and Power BI, resolving reporting gaps and metric inconsistencies across client dashboards.
- Ran UAT cycles, data quality audits, and custom KPI reports to improve visibility across executive dashboards.

EDUCATION

Master of Applied Business — Business Analytics, Unitec Institute of Technology, Auckland

2024 – 2025

- Covered predictive modelling, business intelligence, digital transformation, and AI data strategy. Research focused on EV demand and fuel price analysis.

Bachelor of Technology — Automobile Engineering, Rajasthan Technical University, India

2015 – 2019

- Designed and built a solar-powered vehicle as part of a team that represented the university at a national engineering competition.

CERTIFICATIONS

- Building AI Agents with Snowflake | Intro to Gen AI with Snowflake | Snowflake for Devs & Engineers
- Building Generative AI Apps to Talk to Your Data | Power BI + Claude: AI Modeling with MCP Connector
- Agile Business Analysis | Generative AI Strategic Business Analysis

ADDITIONAL EXPERIENCE

- **Security Staff:** Contracted at major events — Coldplay, Ed Sheeran, and Travis Scott concerts, sporting events, film sets, court, and bank security — covering crowd management, safety, and access control.
- **Warehouse, Retail & Hospitality:** Traffic Controller at Vector Energy; hotel and campground management; retail at Countdown; hospitality at Burger King (since Oct 2024).

FEATURED WEBSITES

Pragati Parihar Journal

<https://prateek02061997.github.io/thepragatijournal/>

Inspired by The New York Times and Apple News — a modern digital journalism platform covering investigative stories, research commentary, and opinion writing.

Creative Nails & Heena by Nidhi

https://prateek02061997.github.io/creative_hands_by_nidhi/

Inspired by luxury art aesthetics — a portfolio and booking site for a premium Auckland henna and nail artist.
