PROFESSIONAL SUMMARY

SQL focused Business Analytics and AI Operations Specialist with a proven track record of surfacing insights from enterprise data lakes. Skilled in building automated reporting workflows, telemetry diagnostics, and LLM powered business intelligence tools across complex data environments. Comfortable translating technical outputs into structured executive summaries that improve data accuracy and operational decision making.

SKILLS

AI and Data Platforms: Claude API, AI Agents, Snowflake, Data Lakes, AI Ready Datasets, GitHub, Railway, Vercel
Data Engineering and Analytics: SQL, ETL and ELT, Power BI, Power Query, DAX, Python, Data Modelling, Data Cleaning, Pipeline Development
Delivery and Stakeholder Management: Agile Environments, Client Engagement, Requirements Gathering, Dashboarding, Process Improvement
Ways of Working: Cross Functional Collaboration, Independent End to End Delivery, Continuous Learning

PROFESSIONAL EXPERIENCE

- Data Logician and Field Services Specialist, AA New Zealand**

Apr 2026 to Present

 - Queried and analysed operational and roadside telemetry data across enterprise data lakes using SQL and ETL tools to identify root causes behind service issues and reduce MTTR.
 - Maintained automated data records, incident logs, and KPI reporting standards to keep data accurate and consistent across all field service metrics.
 - Communicated performance findings to customers and internal teams clearly and promptly to support operational reviews and process improvement cycles.
- Customer Insights Specialist, Uber Process, Teleperformance**

Jul 2022 to Dec 2023

 - Built automated ETL reporting workflows using SQL and Power Query, converting complex interaction streams into structured summaries and saving 15 to 20 hours per month.
 - Analysed high volume customer experience data to isolate root causes behind complaint trends, producing weekly insight reports for leadership.
 - Maintained knowledge base systems and automated data processes to reduce recurring ticket resolution delays and improve frontline operational consistency.
- Customer Experience and Operations Specialist, Upstox**

Apr 2021 to Apr 2022

 - Analysed user onboarding datasets and commercial performance metrics within a fintech environment, mapping trends and isolating operational bottlenecks to mitigate funnel drop off by 20 to 25 percent.
 - Engineered structured escalation backlog tracking frameworks to resolve complex customer issues, aligning product and operations teams.
 - Transformed fragmented customer feedback into structured operational insights to support executive decision making.
- Data Associate, Wipro Limited**

Oct 2019 to Mar 2021

 - Validated over 100,000 healthcare transaction records using SQL and Power BI to eliminate reporting gaps and resolve metric inconsistencies across senior stakeholder dashboards.
 - Executed regular UAT cycles, data quality audits, and custom KPI reporting to improve reporting accuracy and visibility across business teams.

SELECTED PROJECTS

- Kiwi Budget Tours | Founder and Insights Lead**

[kiwibudgettours.com](#)

 - Built a booking platform with a WhatsApp connected AI planner linked to structured NZ tourism datasets, automating itinerary generation and booking flows.
- AI CV Assistant | Founder and Developer**

[Live Project](#)

 - Built a production Claude API agent with two stage prompt chaining (structured JSON schema generation and deterministic rendering) hosted on Railway and GitHub.
- AI BI Copilot | Developer**

[Live Project](#)

 - Built a Python and LLM powered BI assistant that queries cloud data lakes using SQL and Power BI to surface anomalies and trends in natural language.
- Generative AI Business Process Automation | AI Automation Analyst**

[Live Project](#)

 - Designed multi step Claude and OpenAI API workflows via REST endpoints, cutting manual reporting time by 70 percent with human review checkpoints.
- Gilmours Distribution Workflow Analysis | Operational Analyst**

[Live Project](#)

 - Mapped an end to end supply and distribution process through stakeholder interviews, delivering a data backed redesign projecting a 20 percent reduction in operational delays.
- Fuel Prices and EV Demand in NZ | Masters Thesis Analyst**

[Live Project](#)

 - Analysed 15 years of panel data across 4 countries alongside a 103 respondent survey using Granger causality, elasticity analysis, and ARIMA forecasting models.

EDUCATION

- Master of Applied Business, Business Analytics, Unitec Institute of Technology**

Auckland, NZ | 2024 to 2025

 - Coursework focused on predictive modelling, business intelligence, digital transformation, and converting data into commercial business strategy.
- Bachelor of Technology, Automobile Engineering, Rajasthan Technical University**

India | 2015 to 2019

 - Designed and built a solar powered vehicle as part of a team representing the university at a national engineering championship.
