NZ Open Work Visa valid to Feb 2029

PROFESSIONAL SUMMARY

SQL-focused data analyst with genuine fintech experience and a consistent track record of surfacing insights from large, complex datasets. Comfortable translating business requirements into structured analysis, building reporting frameworks, and communicating findings clearly to stakeholders, with a detail-driven approach to data accuracy and quality.

SKILLS

Data and Analysis: SQL, Data Manipulation, Large Dataset Analysis, Python, Statistical Analysis, Root Cause Analysis

Reporting and Tools: Power BI, Advanced Excel, Power Query, DAX, Dashboards and Reporting Frameworks

Customer and Commercial: Customer Analytics, Fintech and Financial Services Experience, CRM-Adjacent Reporting

Ways of Working: Stakeholder Management, Communication, Structured Problem Solving, Attention to Detail, Data Quality

ANALYTICS PROJECTS

Fuel Prices and EV Demand in New Zealand, Masters Thesis Analyst

<https://prateek02061997.github.io/portfolio2/projects/ev-fuel-price-thesis/index.html>

- Analysed 15 years of panel data across four countries, applying elasticity analysis, Granger causality, and ARIMA forecasting to surface behavioural and demand trends from a large, complex dataset.
- Combined statistical modelling with a 103 respondent consumer survey and a 3 month real world ownership trial, translating technical findings into a clear narrative for a non-technical audience.

AI Business Intelligence Copilot, Developer

<https://prateek02061997.github.io/portfolio2/projects/ai-bi-copilot/index.html>

- Built an AI-powered BI assistant to answer natural language questions over business data, reducing time spent building one-off reports and dashboards.
- Designed the tool to surface trends and anomalies automatically, supporting faster, more confident performance tracking.

AI-Powered Retail Demand Forecasting System, Analyst

<https://prateek02061997.github.io/portfolio2/projects/ai-demand-forecasting/index.html>

- Built a demand forecasting model to anticipate product-level shifts, applying trend analysis to support planning decisions.
- Converted forecasting outputs into clear, decision-ready reporting for non-technical stakeholders.

Generative AI Business Process Automation, AI Automation Analyst

<https://prateek02061997.github.io/portfolio2/projects/interactive-dashboard/index.html>

- Built multi-step AI automation workflows using Claude and the OpenAI API to replace repetitive reporting and drafting tasks, achieving a 70 percent reduction in manual reporting time.
- Mapped business processes to identify high-value automation opportunities while preserving human review checkpoints for accuracy.

Gilmours Distribution Workflow Analysis and Process Redesign, Operational Analyst

<https://prateek02061997.github.io/Prateek-Portfolio>

- Mapped an end-to-end supply and distribution process through stakeholder interviews with drivers, dispatchers, and warehouse staff, identifying root causes of recurring delay.
- Delivered a data-backed redesign case recommending automation and scheduling changes, projecting a 20 percent reduction in operational delay.

AI CV Assistant, Founder and Developer

<https://prateek02061997.github.io/portfolio2/projects/ai-cv-assistant/index.html>

- Built a Telegram based AI agent using the Claude API to automatically generate tailored CVs and cover letters from job descriptions in seconds.
- Managed the full build to deployment pipeline independently, hosting the codebase on GitHub and deploying the application on Railway.

PROFESSIONAL EXPERIENCE

- Data Logician and Field Services Specialist, AA New Zealand**

Apr 2026 to Present

 - Query and analyse operational and performance data using SQL and Power BI to identify root causes behind service issues.
 - Maintain automated data records and reporting standards that keep accuracy and consistency intact across all service KPIs.
 - Communicate performance findings to customers and internal teams clearly and promptly.
- Customer Insights Specialist, Uber Eats Process, Teleperformance**

Jul 2022 to Dec 2023

 - Led data analysis to identify root causes behind customer experience issues and complaint trends across multiple digital channels.
 - Generated weekly reports for leadership audiences, simplifying complex data into key drivers and priorities.
 - Maintained knowledge base systems to support continuous process improvement and reduce manual reporting effort.
- Customer Experience and Operations Specialist, Upstox**

Apr 2021 to Apr 2022

 - Analysed customer onboarding datasets and commercial performance metrics within a fintech environment, mapping trends and isolating operational bottlenecks.
 - Transformed fragmented customer feedback into structured, actionable insights that helped product and operations teams maximise commercial outcomes.
 - Managed day-to-day stakeholder communication to influence decisions and ensure initiatives delivered measurable business outcomes.
- Data Associate, Wipro Limited**

Oct 2019 to Mar 2021

 - Validated large-scale data structures using SQL and Power BI to eliminate reporting gaps and resolve metric inconsistencies across senior stakeholder dashboards.
 - Executed regular UAT, data quality audits, and custom KPI reporting to improve reporting accuracy and visibility across business teams.

EDUCATION

- Master of Applied Business, Business Analytics, Unitec Institute of Technology, Auckland**

2024 to 2025

 - Coursework focused on predictive modelling, business intelligence, digital transformation, and converting data into commercial business strategy.
- Bachelor of Technology, Automobile Engineering, Rajasthan Technical University, India**

2015 to 2019

 - Designed and built a solar powered vehicle as part of a team representing the university at a national engineering championship.
