## PROFESSIONAL SUMMARY

Results-driven Business Analytics & AI Operations Specialist with expertise in process intelligence, telemetry diagnostics, and automated API workflows. Proficient in querying enterprise data lakes using SQL, Python, and Snowflake to transform complex operational streams into actionable business intelligence and automated reporting pipelines. Proven track record of architecting LLM-powered agentic tools, streamlining cross-functional operations, and driving measurable efficiency gains across multi-stakeholder environments.

## CORE SKILLS

**AI & Data Platforms:** Claude API | AI Agents | Snowflake | Data Lakes | AI-Ready Datasets | GitHub | Railway | Vercel  
**Data Engineering & Analytics:** SQL | ETL/ELT | Power BI | Power Query | DAX | Python | Data Modelling | Data Cleaning | Pipeline Development  
**Delivery & Stakeholder Management:** Agile Environments | Client Engagement | Requirements Gathering | Dashboarding | Process Improvement  
**Ways of Working:** Cross-Functional Collaboration | Independent End-to-End Delivery | Continuous Learning

## PROFESSIONAL EXPERIENCE

**Data Logician & Field Services Specialist — AA New Zealand** Apr 2026 – Present

- Architected & executed** complex SQL queries across enterprise data lakes to extract, cleanse, and model roadside telemetry and operational data, reducing Mean Time to Resolution (MTTR) for service bottlenecks.
- Engineered & maintained** automated data reporting pipelines and incident logs, standardizing cross-functional KPI tracking and ensuring 99%+ metric consistency across field service operations.
- Streamlined** operational reviews by synthesizing diagnostic insights into executive dashboards and direct customer presentations, accelerating data-driven process improvement cycles.

**Customer Insights Specialist (Uber Eats) — Teleperformance** Jul 2022 – Dec 2023

- Automated & optimized** end-to-end ETL reporting workflows using SQL and Power Query, converting unstructured interaction data streams into structured summaries and saving ~15–20 hours/month in manual compilation time.
- Analyzed & synthesized** high-volume customer experience telemetry to isolate root causes of service friction, delivering weekly operational insight reports to leadership.
- Audited & restructured** knowledge base data architectures and incident tracking systems, reducing recurring ticket resolution delays and improving frontline operational consistency.

**Customer Experience & Operations Specialist — Upstox** Apr 2021 – Apr 2022

- Analyzed** user onboarding conversion funnels and customer acquisition datasets, identifying key drop-off bottlenecks and implementing targeted operational interventions that mitigated funnel friction by ~20–25%.
- Engineered** structured escalation backlog tracking frameworks to resolve complex customer issues, driving alignment across product, compliance, and support engineering teams.
- Formulated & presented** quantitative customer trend reports to executive stakeholders, driving data-backed iterations to trading platform onboarding flows.

**Data Associate — Wipro Limited** Oct 2019 – Mar 2021

- Audited & validated** 100,000+ healthcare transaction records using SQL and Power BI, resolving reporting gaps, schema mismatches, and compliance inconsistencies across client-facing data delivery pipelines.
- Executed** end-to-end User Acceptance Testing (UAT) cycles and data quality checks across enterprise data delivery infrastructure, ensuring strict metric alignment before client sign-off.
- Designed & deployed** custom KPI reporting modules that increased operational visibility for executive leadership and streamlined recurring compliance reporting.

SELECTED PROJECTS

- Kiwi Budget Tours — Founder & Insights Lead

kiwibudgettours.com

  - Engineered a booking platform integrated with a WhatsApp-connected AI planner linked to structured New Zealand tourism datasets, automating dynamic itinerary generation, real-time pricing queries, and customer booking flows.
- AI CV Assistant — Founder & Developer

Live Project

  - Architected & deployed a production AI agent leveraging Claude API, Railway, and Vercel utilizing a two-stage prompt chaining architecture (structured JSON schema generation followed by deterministic rendering) to parse unstructured career histories into ATS-optimized CV documents.
- AI BI Copilot — Developer

Live Project

  - Engineered a Python- and LLM-powered Business Intelligence assistant that translates natural language queries into optimized SQL and Power BI models, enabling non-technical stakeholders to query cloud data lakes and detect anomalies in real time.
- Generative AI Business Process Automation — AI Automation Analyst

Live Project

  - Designed & implemented multi-step Claude and OpenAI API workflows via REST endpoints featuring human-in-the-loop review checkpoints, automating recurring drafting, compilation, and data aggregation to reduce manual reporting cycles by 70%.
- Gilmours Distribution Workflow Analysis — Operational Analyst

Live Project

  - Mapped & analyzed end-to-end delivery workflows across driver dispatchers and logistics networks using process intelligence methodologies, delivering a data-backed operational redesign projected to reduce delivery delays by 20%.
- Fuel Prices & EV Demand in NZ — Masters Thesis Analyst

Live Project

  - Modeled & validated 15 years of macroeconomic panel data across 4 countries alongside a 103-respondent empirical survey using Granger causality tests, price elasticity analysis, and ARIMA forecasting models to project electric vehicle adoption trends.

EDUCATION

- Master of Applied Business — Business Analytics — Unitec Institute of Technology

Auckland, NZ | 2024 – 2025
- Bachelor of Technology — Automobile Engineering — Rajasthan Technical University

India | 2015 – 2019

CERTIFICATIONS

- ✓ Microsoft Azure AI Essentials Professional Certificate – Microsoft

✓ Building AI Agents with Snowflake – Snowflake
- ✓ Building Generative AI Apps to Talk to Your Data – DeepLearning.AI
